PROJECTS

Filmaniac | A ReactJS API based project
ReactJS | Redux | Axios | Infinite scrolling | Lazy load image | React spinner | Sass
Code | Demo

- Implemented infinite scrolling using **react-infinite-scroll-component** to enhance user experience
- Utilized **Redux** and **Redux Toolkit** for efficient state management, enhancing data flow and application scalability
- Enhanced image loading performance by implementing **react-lazy-load-image-component** for image rendering
- Implemented dynamic loading indicators using **react-loader-spinner** to improve the visual effect
- Used a css pre-processor **SASS** to build dynamic style sheets which in turn helped in making it super responsive

Google-Search-Clone | A ReactJS API based project
ReactJS | Tailwind CSS | Context Api | Axios | React-Router-Dom | React-Icons
Code | Demo

- Utilized the **Context API** to efficiently manage and share state across components, enhancing data flow and maintainability
- Implemented **pagination** functionality improving user navigation
- Utilized the **Axios** package to facilitate efficient data fetching and API integration
- Successfully integrated **dark mode** and light mode functionality, enhancing user experience and accessibility

Youtube-Clone | A ReactJS API based project
ReactJS | Tailwind CSS | Context Api | Axios | React-Router-Dom | React-Player
Code | Demo

- Used **Context Api** for sharing global state variables across multiple components
- Representation of dates and time in different formats using the **dayjs** library
- Used **React-Player** as the media player for playing youtube videos
- Responsive **toggling drawer** for easy navigation
- Utilized the **Axios** package to facilitate efficient data fetching and API integration
- The web app is completely **responsive** for all types of available media devices

TokenTradeX | A ReactJS API based project
ReactJS | React Hooks | Axios | Chakra UI | ChartJS
Code | Demo

- Achieved faster development and built reusable components using **Chakra UI**
- Leveraged the **ChartJS** package to create dynamic and visually appealing data visualizations enhancing user engagement
- Implemented **pagination** functionality for a smooth user experience
- Completely **responsive** for all devices of varying widths
